# LESS

LESS FOOD PROTECTOR

**Less is more...this was Versa-Gard's approach to designing Captur™. Food protectors are a necessary evil, and most operators would prefer not to have them at all. With Captur™, the food protector disappears, leaving the food with less "clutter" around it.**

**Versa-Gard's passion is designing food protection systems that help sell food and make it more appealing, all while ensuring the utmost level of protection for the consumer.**

**Every single component of Versa-Gard's Captur™ line is precision machined to within two thousandths of an inch. All components are produced, finished, packaged and shipped from our facility in Georgia, thus 100% made in the USA.**

All Captur<sup>™</sup> products meet and/or exceed the most recent NSF/ANSI 2 standard.

With bent tempered glass panels, most products can clear-span up to 92" without any center support structures.

Vertical support panels are 10mm clear tempered glass with polished edges.

Easier to clean than any other food protector on the market

ENHANCED FOOD VISIBILITY
